

A COMPLETE INTRODUCTION TO ABSTRACT ALGEBRA

ERRATA

Kan Onn Kit

2025-01-19 2050H

Despite my best efforts, some errors have unfortunately been made in *A Complete Introduction To Abstract Algebra*. This document lists the errors that have been made, and their corrections.

In the 1st Edition (Post 1) [and Before]

Major Errors

None found.

Minor Errors

None found.

Typos

- There is a minor grammatical error in the proof of lemma 9.4.3, where the phrase “second bullet point is proven by” should have been “second bullet point was proven by”.
- In the list of frequently used notation,
 - “Stabilizer of x by G ” should have been “Stabilizer of x by G ”; and
 - “Principal ideal generateed by” should have been “Principal ideal generated by”.

In the 1st Edition [and Before]

Major Errors

None found.

Minor Errors

- In example 5.1.5, I missed out a few elements in the set R . The full set should be

$$R = \{(3,3), (3,5), (3,7), (4,4), (4,6), (5,3), (5,5), \\ (5,7), (6,4), (6,6), (7,3), (7,5), (7,7)\}.$$

Typos

- There is a small typo in the answer of exercise 1.1(f). The non-italicised "S" should be italicised (as it is the name of a set).
